Firearm Safety Rules

1. **ALWAYS** keep the gun pointed in a safe direction.

This is the primary rule of gun safety. A safe direction means that the gun is pointed so that even if it were to go off it would not cause injury to others or damage to property. The key to this rule is to control where the muzzle or front end of the barrel is pointed at all times. Common sense dictates the safest direction, depending on different circumstances.

2. **ALWAYS** keep your finger off the trigger until ready to shoot.

When holding a gun, rest your finger on the trigger guard or along the side of the gun. Until you are actually ready to fire, do not touch the trigger.

3. **ALWAYS** keep the gun unloaded until ready to use.

Whenever you pick up a gun, immediately engage the safety device if possible, and, if the gun has a magazine, remove it before opening the action and looking into the chamber(s) which should be clear of ammunition. If you do not know how to open the action or inspect the chamber(s), leave the gun alone and get help from someone who does.

4. **ALWAYS** Know your target and what is beyond.

Be absolutely certain you have identified your target beyond any doubt. Equally important, be absolutely certain the area beyond your target is clear. This means observing your entire area of fire *before* you shoot. Never fire in a direction in which there may be people or property that may be damaged. *Think* first. *Look* second. *Shoot* third.

Know how to use the gun safely.

Before handling a gun, learn how it operates. Know its basic parts, know how to safely open and close the action and remove any ammunition from the gun or magazine. Remember, a gun's mechanical safety device is never foolproof. Nothing can ever replace safe gun handling.

Be sure the gun is safe to operate.

Just like other tools, guns need regular maintenance to remain operable. Regular cleaning and proper storage are a part of the gun's general upkeep. If there is any question concerning a gun's ability to function, a knowledgeable gunsmith should look at it.

Use only the correct ammunition for your gun.

Only BB's, pellets, cartridges or shells designed for a particular gun and caliber can be fired safely in that gun. Most guns have the ammunition type stamped on the barrel. Ammunition can

be identified by information printed on the box and sometimes stamped on the cartridge. Do not shoot the gun unless you know you have the proper ammunition.

Wear eye and ear protection as appropriate.

Guns are loud and the noise can cause hearing damage. They can also emit debris and hot gas that could cause eye injury. For these reasons, safety glasses and hearing protection should always be worn by shooters and spectators.

Never use alcohol or over-the-counter, prescription or other drugs before or while shooting.

Alcohol, as well as any other substance likely to impair normal mental or physical bodily functions, must not be used before or while handling or shooting guns.

Store guns so they are not accessible to unauthorized persons.

Many factors must be considered when deciding where and how to store guns. A person's particular situation will be a major part of the consideration. Dozens of gun storage devices, as well as locking devices that attach directly to the gun, are available. However, mechanical locking devices, like the mechanical safeties built into guns, can fail and should not be used as a substitute for safe gun handling and the observance of all gun safety rules.

Notes on Standards

The material on these pages is a collection of Standards submitted by Readers who want to share their knowledge with others. Handgunlaw.us, Steve Aikens and Gary Slider assume no liability for the use of the material contained within.

There is no substitute for good firearms training and knowledge. You should know and practice all the laws of handgun safety at all times when shooting/practicing with any firearm. You should have a good quality holster that is made to carry the firearm you are using with it. Any holster used must be of good quality, cover the trigger and must not collapse when the firearm is drawn, allowing you to reholster with one hand.

If you wish to contribute your Standard Course/s not listed here email us, and if appropriate we will add it, giving you credit for the listing.

Standards Clicking on Standard in listing will take you to that Standard.

Targets

There are a lot of different targets out there. You can use any target you wish. The more life- like when training for self-defense the better. IDPA, B27 police targets or many other commercially made targets are very good for practice. Putting tee shirts on your targets will also make the targets look like what you would be facing in a life and death situation. You can also use almost anything else. A 3 X 5 Index card, ½ sheets of paper, full sheets of paper or just about anything else you can think of. We do not recommend using bottles, cans or other similar items. Paper works best and is easiest to clean up and leave the range area clean. Be aware of bullet splatter and ricochet when shooting steel objects or targets.

Law Enforcement Targets <https://targets.net/collections/law-enforcement-targets> is a web site that sells targets but also has images of many of the targets that are used in many Drills and Qualifications. We are in no way endorsing this web site but list it here as a reference tool for our readers.

Cover

In any self-defense use of a firearm, avoiding getting shot is equally important as stopping the attacker. You should always practice moving to cover and shooting from cover when you practice with your firearm. You will react as you train and moving to cover during practice will lead to, in most cases, moving to cover when your handgun comes out in that self defense situation. If you practice that way you will react that way. *Perfect practice makes perfect.*

This is how everyone is training now. As we learn more and more about what happens in life and death situations, we are learning we react exactly as we have trained. Most Drills don't take cover into consideration. Do make changes to the standards listed here and use cover or move to cover at the start of your draw.

Dry Fire Safety

Pick one room for dry fire practice and remove any ammunition from that room. Do not allow any ammunition to come into that room. You can use snap caps if you are concerned about damaging your firearm while dry firing. Contact the maker of your firearm if you are concerned about dry firing your handgun. Do not dry fire a rim fire firearm like a .22 or .17 without snap caps. Dry firing those firearms without snap caps will damage the firearm.

Practicing reloading along with your dry fire Drills must be done *only* with snap caps. You cannot allow any ammo into the room and those few dollars for snap caps are a lot cheaper than putting holes in something in your home or worse, negligently shooting someone. Never forget that you are 100% responsible for all rounds that come out of your firearm.

Classifier Stage Setup

Limited Vickers Count Scoring

The classifier is designed to be shot as a continuous ninety (90) round match. While it is permissible to allow re-shoots due to gun problems and/or mental shooter errors for the purpose of accurate classification, no re-shoots are to be permitted of individual strings of fire. If the classifier is part of a scored match or the shooter is trying to attain a five (5) gun award, no re-shoots are permitted and it must be shot as one continuous ninety (90) round course of fire.

For positions for each string, refer to "Stage Setup". Pistols must start from the mechanical condition of readiness appropriate to their design and be loaded to division capacity.

S3 Bullseye National Match

The National Match is a simple objective bullseye course of 30 rounds fired on three targets. Official NRA targets are readily available, calibrated to score consistently at a various distances (50 ft, 25 yds, or 75 yds).

Remember that official NRA bullseye is shot strong hand only.

Match Stages:

- Slow fire: 10 rounds on slow fire target in 10 minutes.
- Timed fire: 10 rounds on timed/rapid-fire target, in 2 strings, each consisting of 5 shots in 20 seconds.
- Rapid-fire: 10 rounds on timed/rapid-fire target, in 2 strings, each consisting of 5 shots in 10 seconds.

Scoring: Any bullet hole crossing a scoring line is awarded the higher score. A perfect score on all three targets is 300 points.

Points	Percentage	Ranking
Less than 255 pts	Below 85%	Marksman
255-269 pts	85%-89.99%	Sharpshooter
270-284 pts	90%-94.99%	Expert
285-290 pts	95%-96.99%	Master

e. Night firing conditions may be artificially created. However, if light dimming goggles are used, handheld light must still be deployed were directed.

f. Some ambient light may be provided

- F. Reloading drills are 'shot to shot' times. In other words, after the start signal, fire a shot, perform the reload, fire another shot, then check the time from shot one to shot two. No target required.
- G. Malfunction drills are 'start signal to shot times.' In other words, set up the malfunction, then on the start signal, perform malfunction clearance, then fire a shot. No target required.

#S21 The Central Texas Standards

C. McCormick/R. Coleman

Set up three IPSC targets in an "El Presidente" configuration, side by side, about shoulder width apart. The leftmost target is "A", middle target is "B", right target is "C". The course is divided into 6 parts and is a series of timed-fire, Virginia count exercises. Since it's timed fire, misses and shots not fired incur no penalties. Overtime shots are -5 points. The start position for each string is your choice: I typically use hands at sides or 'surrender'. Score and tape targets after each part.

Part 1

50 Yards

- 1 shot on A, prone -- 7.5 secs -- 5x (5 rnds)
- 2 shots on B, standing -- 5.5 secs - 4x (8 rnds)

A Grand Master should be able to 'clean' this drill. Calculate your percentage assuming 100% is 625 points.

Variations

- Change the start position to drawing from a table or other position.
- Take one step forward during each reload to practice moving and reloading.
- Add no-shoots covering the right C/D zone of "A" to the left D zone of "B" and the right D zone of "B" to the left C/D zone of "C". Score penalties.
- Score the bottom half of all targets as hard cover (from base of A zone down) and score hits in hard cover as misses.

S25 USNA Pistol Qualification Course Of Fire Prior to 2005.

This course of fire is no longer used.

Compiled by Rob Amagna

On the pistol range, Plebes shoot in the standing position. Silhouette targets are posted 25 meters down range from the firing line. The pistol qualification course of fire consists of 30 shots fired in a session. This 30 shot session is shot twice for a possible score of 150 points.

- Slow Fire portion - 10 shots in 5 minutes
- Timed Fire portion - Two 5 shot strings in 20 seconds (each of the 5 shot strings is shot in 20 seconds)
- Rapid Fire portion - Two 5 shot strings in 10 seconds (each of the 5 shot strings is shot in 10 seconds)

In preparation, Plebes fire a 40 round practice session and then pull their silhouette targets and hang new ones.

They then shoot two 30-round qualification sessions. After the two sessions, the pistol coaches score the silhouette targets and figure out who has not yet qualified at that point. Coaches take

those Mids and give them a remedial round where they will shoot another 30 round qualification session.

The pistol qualification target used is the 25 meter B21X Reversed "Standing Man" Silhouette. It is 23" wide and 35" high with a 5X centershot ring. The silhouette is light tan with a black background making it easier to focus on sight alignment and the pistol's front sight post. The highest possible score on this target is 150 points (30 shots times 5). Although this is a K & D Target - scoring this target uses the indicated "K" values. The "D" values are not counted.

Pistol hand grip and position techniques may vary. The Weaver position is very popular. The isosceles triangle position is also widely used among IDPA competitors and law enforcement officers across the country.

Pistol Qualification Scores

- Pistol Marksman qual is shot with a minimum score of 114 points
- Pistol Sharpshooter qual is shot with a score of between 129 - 143 points
- Pistol Expert qual is shot with a score higher than 144 out of a possible 150 points
